

Edinburgh April 5. 1851.

Neubauer - Cesacanth
coloured tube - short
young

My dear Dr. Harvey

Among some Algae
sent to me to be named
& which being required
I have been obliged to
look at in a desperate
hurry, I find a Ceramium
fixed down, from which
I have abstracted the
enclosed morsels. I could
not satisfy myself about
it, & send it to you
as the Refuge for the

distressed in such cir-
cumstances - what is
it?

Yours faithfully,
R. H. Greville

D^r Harney.
